 Website: www.central.coop

Statement Date 10/10/2025
 Account Number xxxxxxxx
 Customer Name xxxxx x xxxxxxxx

Rate Schedule NMRES
 Bill Type REGULAR
 Service Map Location xxxxxxxx

CEC Information

October is National Co-op Month - a time to celebrate the values that built the cooperative. Since 1937, CEC has been focused on reliable service, community, and member ownership. The cooperative was built by members, for members, and that remains at the center of our values today. Visit our website to learn more about the cooperative difference.

Energy Information

With the holiday season approaching and more time spent in the kitchen, consider ways to save energy in the heart of your home. When possible, cook meals with smaller, energy efficient appliances, such as toaster ovens, slow cookers and air fryers. When using the range, match the size of the pan to the heating element. After your holiday meals are complete, load the dishwasher fully before starting the wash cycle.

Check to see if your neighbors are also without power. If they are report the outage. If you cannot determine whether they have power:
Check for a blown fuse or open circuit breaker in your own equipment.
If you determined through steps one and two that the outage is not a problem with your electric system, report the outage by calling **800-282-8610** or online via central.smarthub.coop
ALWAYS STAY AWAY FROM DOWNED POWER LINES

Non-Payment Disconnect Policy

Central Electric has strict policies in place to deal with past due accounts. If you receive a disconnect notice, you must pay the overdue amount or make acceptable payment arrangements before the disconnect date to avoid service disconnection. Once the meter serviceman visits your service location the account will be disconnected. Meter servicemen are not permitted to accept payments in the field.

Once service is disconnected full payment is required to get reconnected; full payment includes:

- charges up to meter reading at time of disconnect,
- associated fees,
- a security deposit.

Understanding Your Bill

G&T Charge- Kilowatt-hour charges for the generation and transmission of electricity from an energy supplier to the cooperative distribution system.

Distribution Charge- The cost, per kilowatt-hour, to deliver electricity from the cooperative to a member's home or business.

Base Charge- The costs associated with operating and maintaining our distribution system. If your service is connected to our distribution system you pay this charge even if you do not use any kilowatt hours.

Demand Charge- The costs associated with the rate at which you use energy. Demand represents the greatest amount of energy used in 15-minute intervals during a billing cycle. Demand is measured in kilowatts (kw).
